

Tax demo: presenter guide

2025 | Champaign, Illinois | Ten synthetic upload fixtures

All people, companies, addresses, account references and identifiers are fictional. PDFs are custom practice layouts with standard box labels, not official IRS replicas. Do not file. Keep this guide and the answer key out of document ingestion: they disclose the expected answers.

Best four-minute walkthrough

1. Upload 01_W2_complete.pdf and 05_1099INT_complete.pdf for Jordan. Show recognized wages, withholding and interest; show that legitimate optional blanks are not all flagged.
2. In a separate test, upload 03_W2_missing_wages.pdf. Ask the app to identify Box 1 as missing and explain why it cannot simply copy Social Security wages.
3. In a separate test, upload 04_W2_blank_federal_withholding.pdf. Answer that zero withholding was intentional in this alternative scenario. The app should preserve a confirmed zero and the confirmation source.
4. Upload 07_1099INT_blank_interest.pdf in a separate test. Answer that the amount was omitted by mistake; use the verified hidden value 84.50 to demonstrate recovery. An unknown value must remain unknown until verified.
5. For the original Jordan profile, open 10_1040_partial_draft.pdf. Propose taxable interest from the verified 1099-INT, let the user confirm it, and show that downstream calculations remain pending.

Interpret blanks correctly

Not applicable: a box describes something that did not happen. Confirmed zero: the value really is zero, confirmed from context/evidence. Missing: expected information is unavailable. Pending: a draft-return question or calculation has not been completed. Unknown: the app has no basis to classify the blank. A PDF alone cannot reliably reveal intention.

Important guardrails

These W-2/1099 statements would normally be issued by employers or payers. Detecting an omission should lead to verification or issuer replacement/correction, not casual editing of the source statement. Unchecked checkboxes and reserved boxes are not missing required fields. Masked recipient TINs can be legitimate on recipient copies.

Do not upload multiple alternatives together as additional income. Casey is a separate person. File 04 is a zero-withholding alternative; never carry the original 2,400 withholding into that test. No tax/refund amounts are promised.

Fixture answer key

01_W2_complete.pdf

Focus: control; boxes 7-14 and 18-20

Hidden facts: No tips, care benefits, retirement entries or local wages/taxes; control number unused.

Expected: Accept populated fields; do not flag every optional empty box. Box 9 is reserved. Unchecked boxes are not missing answers.

02_W2_missing_employer_EIN.pdf

Focus: ein

Hidden facts: 00-0000000 (demo only)

Expected: Pause employer-ID mapping. Do not guess the EIN or tell the employee to alter an employer-issued record.

03_W2_missing_wages.pdf

Focus: box1

Hidden facts: 36,000.00

Expected: Do not copy Box 3 or Box 5 into Box 1; they can differ. Do not treat blank as zero.

04_W2_blank_federal_withholding.pdf

Focus: box2

Hidden facts: 0.00; different scenario from file 01

Expected: Presenter confirms no withholding using scenario context. Record confirmed zero with provenance; do not reuse 2,400 from another variant.

05_1099INT_complete.pdf

Focus: recipient_tin; boxes 2-17

Hidden facts: Masked TIN is intentional. Only ordinary interest of 84.50; no other reportable categories.

Expected: Accept masking on a recipient copy. Obtain full taxpayer identifier separately for an actual return, if needed; do not label masking a damaged form.

06_1099INT_missing_recipient_name.pdf

Focus: recipient

Hidden facts: Jordan Demo

Expected: Keep ownership unverified until confirmed. A matching partial TIN alone should not silently establish ownership.

07_1099INT_blank_interest.pdf

Focus: box1

Hidden facts: 84.50

Expected: Presenter chooses missing amount and verifies 84.50 from the separate guide. Do not derive interest from deposits or guess.

08_1099NEC_complete.pdf

Focus: boxes 4-7

Hidden facts: 1,250.00 compensation; no federal or state withholding reported.

Expected: Recognize nonemployee compensation; route self-employment calculations for review. Do not combine this document with Jordan's return.

09_1099NEC_blank_compensation.pdf

Focus: box1

Hidden facts: 1,250.00

Expected: Presenter confirms omission. Hold income mapping until verified; do not invent a value or silently use zero.

10_1040_partial_draft.pdf

Focus: line2b; downstream lines and dependent confirmation

Hidden facts: Line 2b can be proposed as 84.50 only after confirming file 05 and taxpayer ownership. Other blank lines need intake/calculation.

Expected: Guide user through evidence confirmation. Blank calculated fields are pending workflow, not a malformed payer document. No return is filed or tax/refund calculated in this sample.
